Dainippon Screen and InfoPrint Solutions Inkjet Printing System Leads Industry

More Than 200 Presses Have Been Installed and Are Running in Production

Kyoto, Japan -- May 11, 2010 -- Dainippon Screen Mfg. Co., Ltd and InfoPrint Solutions Company (Headquarters: Colorado, USA; hereafter referred to as IPS; President and CEO: Daisuke Segawa) today announced that the cumulative sales and installations of the Screen Truepress Jet520 and IPS InfoPrint 5000 have now passed the 200 mark worldwide.

IPS selected Screen's drop-on-demand inkjet technology as the best balance in addressing customer high-speed production requirements after an in-depth review of all inkjet technologies available, or in development. The Truepress Jet520 and InfoPrint 5000 are used in a broad variety of applications, ranging from account statements to books and newspapers, in the printing industry worldwide. As a result, since 2007, Screen and its partner, IPS, have sold and installed more than 200 continuous-feed color inkjet presses as of the end of March 2010.

Screen looks forward to continuing to deepen its connection with IPS while using the companies' combined technological strengths and expertise to actively pursue superior solutions for customers demanding high-end quality.

Comments from Kyohei Fujisawa, Corporate Executive Officer of Dainippon Screen Mfg. Co., Ltd., President of the Media and Precision Technology Company

Our inkjet system's success in the market demonstrates the high value customers place on our well controlled drop-on-demand inkjet technology, color management, patented screening algorithms, and stable paper transportation system that deliver excellent print quality. Our strong alliance with IPS has broadened our coverage and resulted in our ability to increase investment in our unique inkjet technology. As a result, we have sold and installed more than 200 presses world-wide. We will continue to bring customers an even broader range of functions to meet their particular needs, now and in the future.

Comments from George Promis, Vice-President of InfoPrint Production Inkjet Solutions & Technology Alliances

The results of our decision to use Screen's innovative inkjet technology have exceeded our expectations, as evidenced by strong customer acceptance, both by new customers and clients buying additional systems due to color volume growth. The highly reliable, proven technology in the InfoPrint 5000 enables us to focus on helping customers migrate applications from offset or digital toner-based systems and develop new opportunities. Businesses have depended on IPS digital print technology and world class software and services for over 40 years, and we intend to continue providing the most innovative, reliable, and extensive breadth of output solutions well into the future.

About InfoPrint Solutions

InfoPrint Solutions Company is a joint venture between IBM and Ricoh built on IBM's 50 years in the production print space and Ricoh's excellence in technology innovation. Go to www.infoprint.com for more information. Follow us on Twitter at www.twitter.com/infoprint.
