

Confirmed Cases of COVID-19 at Hikone Site

August 17, 2020

Doc. No.: INFO200817E

On August 14, one employee of SCREEN Semiconductor Solutions Co., Ltd. and one inhouse outsourcing staff working on the premises of our Hikone Site SCREEN Holdings Co., Ltd. were confirmed infected with COVID-19.

In response, we investigated the behavior history in cooperation with the public health center and found that there were no close contacts. In addition, the facility where the employees were working was cleaned and disinfected by professional disinfection services.

On January 24, the Company established a Disaster Response Headquarters, headed by Toshio Hiroe, President and CEO, and we have been working to gather information, check on our employees' health and take preventive measures.

The safety of our clients and employees as well as prevention of infections inside and outside the company are of utmost importance to us. We will work appropriately in cooperation with authorities in Japan. We ask all related parties for their kind understanding and cooperation in these matters.
