

COVID-19 infection case confirmed at a European Subsidiary (On January 6, 2021, local time)

January 07, 2021

Doc. No.: INFO210107E

On January 6, 2021, local time, one employee of Inca Digital Printers LTD., a European subsidiary, was confirmed infected with COVID-19. We have found that there was no causal relationship between this and the past cases.

In response, we have completed cleaning and disinfection the facility where the employee was working.

On January 24, 2020, the Company established a Disaster Response Headquarters, headed by Toshio Hiroe, President and CEO, and we have been working to gather information, check on our employees' health and take preventive measures.

The safety of our clients and employees as well as prevention of infections inside and outside the company are of utmost importance to us. We will work appropriately in cooperation with authorities in Japan and other countries. We ask all related parties for their kind understanding and cooperation in these matters.
