

SCREEN Semiconductor Solutions Co., Ltd.

Global training center established in Kumamoto

Kyoto, Japan – June 7, 2023 – SCREEN SPE Service Co., Ltd. (hereafter referred to as “SESV”), a group company of SCREEN Semiconductor Solutions Co., Ltd., has recently announced the establishment of a new global training center for cutting-edge equipment within the Kumamoto Site (2083-7 Oyatsu, Mashiki-machi, Kamimashiki-gun, Kumamoto Prefecture).

SESV Kumamoto Site

Global training center

The immediate proximity allows the training center to utilize SESV’s wealth of knowhow on equipment setup, maintenance, and modification which have been cultivated over many years. We will train field service engineers there and dispatch them around the world to provide product maintenance training for customers, deliver and set up our products, and support their operations.

SCREEN is also constructing S³-5 at the Hikone Site: a new factory for semiconductor manufacturing equipment, in anticipation of the expanding demand in the industry that is expected to continue growing over the long term.

As a leading company of semiconductor cleaning equipment, SCREEN Semiconductor Solutions will continue to invest in expanding its capacity across the three group companies and enhance maintenance and support services to contribute to the further development of the semiconductor industry.
